DETAILED ACTION

Status of Claims

1. Claims 1, 25-29, 32, 33 and 35 are pending in this application. Claims 2-24, 30, 31, and 36-49 have been cancelled. Claim 34 has been withdrawn. This action is in response to the applicants' request for a continued examination filed on March 11, 2009.

Withdrawn Rejections/Objections

2. Applicant is notified that any outstanding rejection/objection that is not expressly maintained in this office action has been withdrawn or rendered moot in view of applicant's amendments and/or remarks.

Claim Objections

3. Claim 1 is objected to because of the following informalities: The definition of "Cyc1" in claim 1, contains the term "Cycl1" which is believed to be a typographical error, however no "Cycl1" term is seen anywhere else in the claim. Appropriate correction is required.

Claim Rejections - 35 USC § 112, 2nd paragraph

4. Claims 1 and 35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Both claims 1 and 35 define "M" as a 3- to 11-membered monocyclic or bicyclic group, but then further define "M" as six different ring systems, each of which can only permit M to be a 5- or 6-membered monocyclic ring system. In order to resolve any

Art Unit: 1624

confusion, it is suggested to amend the definition of M to read, "M represents a 5- to 6-membered group which may be...". No new matter. Appropriate correction is required.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1, 25, 26, 32, 33 and 35 are rejected under 35 U.S.C. 102(b) as being anticipated by Bradbury, et. al., Journal of Medicinal Chemistry (1997), 40(6), 996-1004.

The prior art contains a compound #71 on page 999, with the following structure:

RN 187973-57-5 CAPLUS
CN 1-Naphthalenesulfonamide, N-[5-bromo-3-(phenylmethoxy)pyrazinyl]-5-(dimethylamino)- (9CI) (CA INDEX NAME)

where the D ring is a pyrazine ring, A represents a phenyl ring and B represents a naphthyl ring. J is an oxygen with a CH₂ group, G represents an aminosulfonyl group.

R¹ represents bromine, R² represents hydrogen, p=0, q=1 and R⁶ is a dimethylamino group.

Double Patenting

7. Claims 1, 25-29, 32, 33 and 35 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-28 and 30 of U.S. Patent Publication Application No. 2007/0254886. The applicants have requested that the double patenting rejection be held in abeyance until the claims are deemed to be in allowable condition.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

8. Claims 1, 25-29, 32, 33 and 35 are rejected.
